TRADE PARTNER PROGRAM

The AV partner who makes you look good.

ALMOND AUDIO VIDEO

We work with Orange County's interior designers, custom builders, and architects on your schedule, to your drawings, and never around you to your client. 20+ years of experience behind every project.

Interior designers

Technology that doesn't fight your room.

- Hidden speakers, art displays, and shades matched to your fabric spec
- Keypad and speaker locations set against your elevations
- Options go to you first, never around you

Builders

We hit rough in, every time.

- Low voltage plans before rough in, not during
- Every run labeled, tested, and photographed before drywall
- Good, better, and best packages for spec homes

Architects

Get it right on the drawing.

- Free drawing review with low voltage notes
- Equipment room size, power, and cooling
- Ceiling structure and sightlines for theaters

How we work with you

One team, start to finish. The people who review your drawings install the system and answer the service call years later.

Your client stays yours. On your project, we present to you. We never go around you.

Free plan review. Send us a set of drawings and we'll mark up the low voltage at no charge.

Referral fee in writing. Typically 5 to 10% of project value, paid when the client pays us.

WHAT WE DO Home theaters · Media rooms · Smart home automation · Lighting control · Motorized shades · Whole home audio · Networking and Wi-Fi · Security cameras · Gates and access control · Outdoor audio and TV
